# 3533 (Website)

*3533* was a trilingual (Greek, Turkish, English) alternative news website in Nicosia that operated from 2013 to 2017. It was the most organized effort to create alternative news from a libertarian perspective following the suspension of Island Anarchy and the blog of Falies.

## Website Identity

> In the divided socio-political landscape of Cyprus and in the power-driven international media sphere, emerging issues of local and global social movements, public contestations, and continuous attempts of ecological destruction are censored systematically, or vocally constrained to a point of silence. This presents a political concern to which we address, by generating an independent means of communication across social, cultural and economic divisions. In our own media sharing platform, we intend to disseminate information from the location 35°0'N 33°0'E, Cyprus, to the world.[1)]
