Bicycle FTW! (Leaflet)

Historical Note

This leaflet was published in 2010 by [Planodio Steki Dromou](#) (Πλανόδιο Στέκι Δρόμου) in Lefkosia.

Content

Bicycle FTW!

A bicycle, for distances up to 13 kilometers, is faster than a car. (a research of the association 'Friends of the Bicycle', Athens)

- It does not pollute the environment with gas emissions or noise pollution.
- Its manufacturing demands only a small number of raw materials and it only consumes renewable fuel (food).
- It's economical as it is cheap and needs minimal maintenance.
- It trains the circulatory - respiratory system, the legs, the abdominal muscles and the triceps.
- It does not get caught in traffic jams.
- It parks anywhere
- With the bicycle you can enjoy the countryside, the wind, the shade, the smells of nature, things you do not experience when shut inside your car.
- You can modify the appearance of your bike whenever you like, easily and with nominal cost
- Bicycles add to the city's vibes and appearance.
- A bicycle enables you to have an immediate contact with the crowd, to communicate and flirt, to experience the power of freedom!
- Liberate yourself from exhaust gases and fumes!

Escape traffic!

Stop contributing to global warming!

Arouse the biker inside you!
