

Greetings from the Buffer Zone

At the End/Beginning and in Between Ledra St/Lokmaci Buffer Zone
which has been under occupation for two months until now.

In Cyprus we have not only become used to the discord between us, but we have also become used to its creation and re-creation. After intense consultations during various open meetings, some of us present to you the frames of the discussions that have evolved through these four proposals:

1. Instant release of the land which is owned by the state, the church and immense landowners in all of Cyprus primarily for ecological uses: reforestation and agriculture for the good of all Cypriots, promoting organic products and Cypriot tourism. Alignment with ecological, environmental, agricultural practices and free education to all citizens on renewable energy and urban agriculture.

2. The right to own a home is a human right and a biological need. Every person should be allocated a home: A place for personal housing and a collective agriculture (recommending collective agriculture for practical reasons, not excluding small private farming). The "problem of rent" as a coercive social debt is the result of the capitalist mechanism which places a price on everything. As the creator of profound psychological and social wounds, it should immediately cease to exist as a "socio-economic problem." The empty homes (and shops) are already in surplus, and no man needs ten houses to live.

3. As we are fully identical to hundreds of other global movements, we demand the complete demilitarization of not only Cyprus, but the entire planet, the end of the global police state, and the development of urban / local militia. Provide free education and higher education, as well as free medical care. Also, education to be liberated from ideologies that produce withered lifeless spaces and empty values.

4. We are against racism, sexism and any ideology that transforms man into an object. Every immigrant or political refugee is welcome on the island, provided they are prepared to contribute.

ANY SOLUTION OF THE CYPRUS PROBLEM TO BE BASED ON THESE PARAMETER
